**Current Activities**

December 14 - 17, 2009, "Dry" plating process lines continues to removed and cut into three foot lengths, in Sections A and H of the building. The resultant pipe sections were then placed into temporary bins for later off-site disposal.

December 14 - 17, 2009, a WSP Environment and Energy technician was on-site to purge thirteen groundwater wells, located around the perimeter of the facility building. Representative groundwater samples were collected from each of the wells for subsequent laboratory analyzes.

December 14 - 17, 2009, the ambient air inside the facility was monitored for following parameters with the use of four AreaRaes: Lower Explosive Limit (LEL), Carbon Monoxide, Hydrogen Cyanide, Hydrogen Sulfide, Volatile Organic Compounds (VOC) and Oxygen. In addition, three DataRams from ERT's RAT, were used to provide real time particulate air monitoring. START personnel also provided written and photo-documentation of site activities.

December 17, 2009, Microbac picked up waste characterization samples for analysis. The results from the analyzes of these samples is expected to be available the week of January 4, 2010.

Agmet, Inc. retrieved their roll-off located at the site.

Security is on-site during non-working hours.

December 18, 2009 to January 3, 2010, no clean-up activities. The site is closed for the Christmas and New Year's Holidays. Security will be on-site during the Holiday break.

### Next Steps

- January 4, 2010, clean-up activities will continue.
